

Serial No. 09/773,092

The following changes are requested to the specification to overcome the objections in the Office Action:

IN THE CLAIMS:

1. A combined system of automatic selling of products and services for automatic vending machines, the combined system of automatic selling of products and services comprising

an inclusion in an automatic machine of a service module that has service operating means,

the machine having a corresponding product selection push buttons and a service selection push button,

the service module having a display to which a payment means is assigned by a display of the automatic machine when a service option is selected,

service operating buttons and service rendering elements,

a service control circuit being controlled by a main control circuit of the automatic machine, the service control circuit thereof being connected to a telephone line.

2. A combined system of automatic selling of products and services, according to claim 1, wherein the service control circuit controls a collection operation of a rendered service by means of the main control circuit of the machine, said main control circuit in turn controlling the service control circuit, the service control circuit carrying out collections by means of the collection operation system of the machine.

3. A combined system of automatic selling of products and services, according to claims 1 or 2, wherein the connection to the telephone line permits the connection to an operations center so that information is transmitted and received.

Bent
4. A combined system of automatic selling of products and services, according to claim 1, wherein the service module is enabled to include a service selection and designation of the payment means button from the display of the machine to the display of the service module.

5. A combined system of automatic selling of products and services, according to any of Claims 1, 2 or 4, wherein the machine is enabled to simultaneously and independently operate dispensing products while the service included by the module thereof is being rendered.

6. A combined system of automatic selling of products and services, according to Claim 3, wherein the machine is enabled to simultaneously and independently operate dispensing products while the service included by the module thereof is being rendered.

REMARKS

Reconsideration of all grounds of objection and rejection, and allowance of this application are respectfully
